CANADIAN JOURNAL OF BIOCHEMISTRY AND CELL BIOLOGY

REVUE CANADIENNE DE BIOCHIMIE ET BIOLOGIE CELLULAIRE

VOLUME 61, 1983

Author Index / Index des auteurs

Abou-Gharbia, M.
Metabolism of N^G-monomethyl-L-arginine
WOON KI PAIK, MAGID ABOU-GHARBIA, DANIEL SWERN, PRABHAKAR LOTLIKAR, and SANGDUK KIM **850**

Affleck, A.
Estrogen–androgen interaction: selective inhibition of estrogen-induced uterine peroxidase by testosterone and 5α-dihydrotestosterone
PETER H. JELLINCK, ANDREW AFFLECK, and ANNE-MARIE NEWCOMBE **779**

Akalehiywot, T.
Phosphorylation of spore coat proteins of *Dictyostelium discoideum*
TESHOME AKALEHIYWOT and CHI-HUNG SIU **996**

Alfano, J.
Cholesterol metabolism in the rat adrenal cortex: acute temporal changes following stress
JOSEPHINE ALFANO, ROBERT C. PEDERSEN, ROBERT E. KRAMER, and ALEXANDER C. BROWNIE **708**

Al-Jobore, A.
Pharmacological antagonism of calmodulin
BASIL D. ROUFOGALIS, ARDA-E-VIRAF M. MINOCHERHOMJEE, and AMEERA AL-JOBORE **927**

Allred, D.R.
Developmental modulation of protein synthetic patterns by the human malarial parasite *Plasmodium falciparum*
DAVID R. ALLRED and IRWIN W. SHERMAN **1304**

Al-Qysi, H.
Thermotropic lipid and protein transitions in Chinese hamster lung cell membranes: relationship to hyperthermic cell killing
JAMES R. LEPOCK, KWAN-HON CHENG, HISHAM AL-QYSI, and JACK KRUUV **421**

Andrews, D.R.
Effect of heat shock on synthesis and phosphorylation of nuclear and cytoplasmic proteins in the fungus *Achlya*
JULIE C. SILVER, DIANE R. ANDREWS, and DAVID PEKKALA **447**

Angel, J.F.
Immunoquantitation of liver glucose-6-phosphate dehydrogenase and malic enzyme in normally and prematurely weaned rats
DONALD W. BACK and JOSEPH F. ANGEL **1108**

Antippa, A.F.
Energy transfer in photosynthetic bacteria as examined by photo-acoustic spectroscopy
FRANÇOIS BOUCHER, LYSANNE LAVOIE, ADEL F. ANTIPPA, and ROGER M. LEBLANC **1117**

Antoun, G.R.
A highly sensitive method for identification of amino termini of proteins: application to multiple forms of poly(C)-avid ribonuclease and 17β-hydroxysteroid dehydrogenase
H. KAPLAN, G. ODA, G.R. ANTOUN, D.G. WILLIAMSON, B. TATTRIE, and E.Z. RABIN **323**

Anwar, R.A.
In vitro translation of elastin mRNA and processing of the translated products and the signal sequence of elastin *a*
STEPHEN A. KRAWETZ, A. SAMPATH NARAYANAN, and RASHID A. ANWAR **274**

Armstrong, G.D.
Receptors for insulin and basic somatomedin: immunological and affinity-chromatographic cross-reactivity
GLEN D. ARMSTRONG, MORLEY D. HOLLENBERG, BANANI BHAUMICK, R. MARVIN BALA, and JOSEPH M. MATURO III **650**

Atkinson, B.G.
Regulation of gene expression in corn (*Zea mays* L.) by heat shock. II. *In vitro* analysis of RNAs from heat-shocked seedlings
CHRIS L. BASZCZYNSKI, DAVID B. WALDEN, and BURR G. ATKINSON **395**

Comparison of the effects of heat shock and metal-ion stress on gene expression in cells undergoing myogenesis
BURR G. ATKINSON, TANJA CUNNINGHAM, ROB L. DEAN, and MARTIN SOMERVILLE **404**

Cold- and heat-shock induction of new gene expression in cultured amphibian cells
C.A. KETOLA-PIRIE and BURR G. ATKINSON **462**

The acquisition of thermal tolerance in larvae of *Calpodes ethlius* (Lepidoptera) and the *in situ* and *in vitro* synthesis of heat-shock proteins
ROB L. DEAN and BURR G. ATKINSON **472**

Babiak, M.J.
Differences in the effects of pH on the hydrolytic and transgalactosylic reactions of β-galactosidase (*Escherichia coli*)
R.E. HUBER, M.T. GAUNT, R.L. SEPT, and M.J. BABIAK **198**

Back, D.W.
Immunoquantitation of liver glucose-6-phosphate dehydrogenase and malic enzyme in normally and prematurely weaned rats
DONALD W. BACK and JOSEPH F. ANGEL **1108**

Baillie, D.L.
Alterations in the pattern of gene expression following heat shock in the nematode *Caenorhabditis elegans*
TERRY P. SNUTCH and DAVID L. BAILLIE **480**

Baker, R.R.
A comparison of the rates of incorporation of fatty acids during the rapid synthesis in vitro of endogenous triacylglycerols by neuronal nuclei
R. Roy Baker and Huu-yi Chang **1265**

Bala, R.M.
Receptors for insulin and basic somatomedin: immunological and affinity-chromatographic cross-reactivity
Glen D. Armstrong, Morley D. Hollenberg, Banani Bhaumick, R. Marvin Bala, and Joseph M. Maturo III **650**

Baldo, J.H.
2-Fluoro-ATP, a fluorinated ATP analog. ^{19}F nuclear magnetic resonance studies of the 2-fluoro-ADP-myosin subfragment-1 complex
John H. Baldo, Poul E. Hansen, John W. Shriver, and Brian D. Sykes **115**

Baldwin, S.
Regulation of oxytocin receptor concentration in rat uterine explants by estrogen and progesterone
Melvyn S. Soloff, Mats Axel Fernstrom, Sumudra Periyasamy, Solweig Soloff, Sam Baldwin, and Michael Wieder **625**

Bally, M.B.
Polymorphism of phosphatidylethanolamine – phosphatidylserine model systems: influence of cholesterol and Mg^{2+} on Ca^{+}-triggered bilayer to hexagonal (H_{II}) transitions
M.B. Bally, C.P.S. Tilcock, M.J. Hope, and P.R. Cullis **346**

Bandoni, R.J.
Isolation of tremerogens *A*-9291-I and *A*-9291-II, novel sex hormones of *Tremella brasiliensis*
Yoshihiro Ishibashi, Youji Sakagami, Akira Isogai, Akinori Suzuki, and Robert J. Bandoni **796**

Banerjee, D.K.
Thermodynamic profiles for alcohol dehydrogenase action in free solution
Keith J. Laidler and D.K. Banerjee **1201**

Baszczynski, C.L.
Regulation of gene expression in corn (*Zea mays* L.) by heat shock. II. *In vitro* analysis of RNAs from heat-shocked seedlings
Chris L. Baszczynski, David B. Walden, and Burr G. Atkinson **395**

Beaudoin, A.R.
Sequential isolation of lamellar bodies and surfactant fractions from rat lungs
J. Boudreau, A.R. Beaudoin, and D. Nadeau **231**

Bélanger, L.
Guinea-pig α_1-fetoprotein: purification, characterization, developmental and hormonal regulation, and behavior in diethylnitrosamine hepatocarcinogenesis
Henriette Gourdeau and Luc Bélanger **1133**

Histone H1° expression during developmental growth of rat liver
Hélène Larue, Elyse Bissonnette, and Luc Bélanger **1197**

Erratum: Guinea-pig α_1-fetoprotein: purification, characterization, developmental and hormonal regulation, and behavior in diethylnitrosamine heptocarcinogenesis
Henriette Gourdeau and Luc Bélanger **1341**

Bell, F.P.
Plasma and liver carnitine (free and esterified) levels and their interrelationships in moderately hypercholesterolemic monkeys (*Macaca arctoides*)
Frank P. Bell and Anthony J. DeLucia **328**

Benderoff, S.
Changes in Na^{+}-ATPase and Na,K-pump during maturation of sheep reticulocytes
Rhoda Blostein, Pierre Drapeau, Stephen Benderoff, and Andrew M. Weigensberg **23**

Berman, M.I.
Studies on primate gonadotropin receptors: comparison of follitropin and lutropin receptors in human testis
M.I. Berman and M.R. Sairam **561**

Best-Belpomme, M.
The possible role of the superoxide ion in the induction of heat-shock and specific proteins in aerobic *Drosophila* cells during return to normoxia after a period of anaerobiosis
M. Ropp, A.M. Courgeon, R. Calvayrac, and M. Best-Belpomme **456**

Bhaumick, B.
Receptors for insulin and basic somatomedin: immunological and affinity-chromatographic cross-reactivity
Glen D. Armstrong, Morley D. Hollenberg, Banani Bhaumick, R. Marvin Bala, and Joseph M. Maturo III **650**

Bhavnani, B.R.
Ontogeny of some enzymes of glycogen metabolism in rabbit fetal heart, lungs, and liver
Bhagu R. Bhavnani **191**

Evidence for the existence of a C_{25}-sesterterpene pathway of steroidogenesis not involving cholesterol as an obligatory intermediate
Bhagu R. Bhavnani and Tony Wong **714**

Bird, C.E.
Rat prostatic acid phosphatase: androgenic control of isoelectric focusing patterns
J. Downey, D. Mahan, T.G. Flynn, C.E. Bird, and A.F. Clark **744**

Bissonnette, E.
Histone H1° expression during developmental growth of rat liver
Hélène Larue, Elyse Bissonnette, and Luc Bélanger **1197**

Blostein, R.
Changes in Na^{+}-ATPase and Na,K-pump during maturation of sheep reticulocytes
Rhoda Blostein, Pierre Drapeau, Stephen Benderoff, and Andrew M. Weigensberg **23**

Blyth, L.M.
Cations and calmodulin in normal and neoplastic cell growth regulation
Robert A. Hickie, Jiann-W. Wei, Lois M. Blyth, David Y.W. Wong, and David J. Klaassen **934**

Bognar, A.
Mechanism of a long-chain fatty aldehyde dehydrogenase induced during the development of bioluminescence in *Beneckea harveyi*
ANDREW BOGNAR and EDWARD MEIGHEN **301**

Boileau, G.
Cell-free synthesis of porcine proopiomelanocortin: two distinct primary translation products
G. BOILEAU, F. GOSSARD, N.G. SEIDAH, and M. CHRÉTIEN **333**

Bortoluzzi, L.C.
Glutamate formyl- and formimino-transferase activities from pig liver
L.C. BORTOLUZZI and R.E. MACKENZIE **248**

Boucher, F.
Energy transfer in photosynthetic bacteria as examined by photoacoustic spectroscopy
FRANÇOIS BOUCHER, LYSANNE LAVOIE, ADEL F. ANTIPPA, and ROGER M. LEBLANC **1117**

Boudreau, J.
Sequential isolation of lamellar bodies and surfactant fractions from rat lungs
J. BOUDREAU, A.R. BEAUDOIN, and D. NADEAU **231**

Brakier-Gingras, L.
A ribosomal defect in dystrophic hamsters
C. JOLICOEUR and L. BRAKIER-GINGRAS **1**

Brand, K.
Some properties of aminopeptidase associated with rat brain cortical synaptosomes
WILLIAM W.-C. CHAN, WOLFGANG DEMMER, and KARL BRAND **1185**

Bridger, W.A.
Phosphorus-31 nuclear magnetic resonance pH titration studies of the phosphoproteins tropomyosin and glycogen phosphorylase *a*
HANS J. VOGEL and WILLIAM A. BRIDGER **363**

Brisson, J.-R.
The relation of three-dimensional structure to biosynthesis in the N-linked oligosaccharides
JEAN-ROBERT BRISSON and JEREMY P. CARVER **1067**

Brockhausen, I.
Mucin synthesis. III. UDP-GlcNAc:Galβ1-3(GlcNAcβ1-6)GalNAc-R (GlcNAc to Gal) β3-*N*-acetylglucosaminyltransferase, an enzyme in porcine gastric mucosa involved in the elongation of mucin-type oligosaccharides
INKA BROCKHAUSEN, DAVID WILLIAMS, KHUSHI L. MATTA, JEANNE ORR, and HARRY SCHACHTER **1322**

Brown, G.M.
Antibodies to indolealkylamines II: site of conjugation of melatonin to protein using formaldehyde
L.J. GROTA, V. SNIECKUS, S.O. DE SILVA, and G.M. BROWN **1096**

Brownie, A.C.
Cholesterol metabolism in the rat adrenal cortex: acute temporal changes following stress
JOSEPHINE ALFANO, ROBERT C. PEDERSEN, ROBERT E. KRAMER, and ALEXANDER C. BROWNIE **708**

Buchanan, G.W.
In vivo detection of cryoprotectants and lipids in overwintering larvae using carbon-13 nuclear magnetic resonance spectroscopy
G.W. BUCHANAN and K.B. STOREY **1260**

Bullock, G.
Progesterone C21 hydroxylation and steroid carboxylic acid biosynthesis in the rabbit. *In vitro* studies with endocrine, metabolic, and potential target tissues
I.R. SENCIALL, G. BULLOCK, and S. RAHAL **722**

Burrow, G.N.
Posttranslational modification of prothyroid hormone
M.C. EGGO, D. DRUCKER, R. CHEIFETZ, and G.N. BURROW **662**

Burtnick, L.D.
Fluorescence of actin-bound hydrophobic molecules
L.D. BURTNICK and K.W. CHAN **981**

Callahan, J.W.
Improved purification of β-galactosidase from rabbit brain: two separable fractions share kinetic and structural properties
NANCY L. FRASER, DONALD MAHURAN, STUART J. FREEMAN, and JOHN W. CALLAHAN **313**

Calvayrac, R.
The possible role of the superoxide ion in the induction of heat-shock and specific proteins in aerobic *Drosophila* cells during return to normoxia after a period of anaerobiosis
M. ROPP, A.M. COURGEON, R. CALVAYRAC, and M. BEST-BELPOMME **456**

Camato, R.
Expression of histone genes during heat shock and in arsenite-treated *Drosophila* Kc cells
R.M. TANGUAY, R. CAMATO, F. LETTRE, and M. VINCENT **414**

Carlo, D.J.
The specific capsular polysaccharide of *Streptococcus pneumoniae* type 20
JAMES C. RICHARDS, MALCOLM B. PERRY, and DENNIS J. CARLO **178**

Carrey, E.A.
The biological activity of glucagon – phospholipid complexes
J.J. LIEPNIEKS, P. STOSKOPF, E.A. CARREY, C. PROSSER, and R.M. EPAND **688**

Carroll, K.K.
Distribution and metabolism of dolichol and dolichyl phosphate in rat liver
JACK W. RIP, NILABH CHAUDHARY, and KENNETH K. CARROLL **1025**

Carver, J.P.
The relation of three-dimensional structure to biosynthesis in the N-linked oligosaccharides
JEAN-ROBERT BRISSON and JEREMY P. CARVER **1067**

Chan, F.
Cellular distribution of enzymes involved in phosphatidylcholine synthesis in developing rat lung
FRANK CHAN, PAUL G.R. HARDING, TANYA WONG, G. FRAZER FELLOWS, and FRED POSSMAYER **107**

Chan, H.W.H.
Identification of nonhistone chromosomal proteins binding specifically to cloned α-fetoprotein DNA sequences
BARRY H. LESSER, HELEN W.H. CHAN, and JOHN F. STOCKTON **254**

Chan, K.W.
Fluorescence of actin-bound hydrophobic molecules
L.D. BURTNICK and K.W. CHAN **981**

Chan, W.W.-C.
Some properties of aminopeptidase associated with rat brain cortical synaptosomes
WILLIAM W.-C. CHAN, WOLFGANG DEMMER, and KARL BRAND **1185**

Chang, H.-y.
A comparison of the rates of incorporation of fatty acids during the rapid synthesis in vitro of endogenous triacylglycerols by neuronal nuclei
R. ROY BAKER and HUU-YI CHANG **1265**

Chapdelaine, P.
Effect of testicular hormones on synthesis of soluble proteins by dog prostate slices
JEAN Y. DUBÉ, PIERRE CHAPDELAINE, and ROLAND R. TREMBLAY **756**

Presence of α-glucosidases in the male reproductive system of the rat and hormonal influences
ANNE-MARIE GRANDMONT, PIERRE CHAPDELAINE, and ROLAND R. TREMBLAY **764**

Chaudhary, N.
Distribution and metabolism of dolichol and dolichyl phosphate in rat liver
JACK W. RIP, NILABH CHAUDHARY, and KENNETH K. CARROLL **1025**

Chauvin, M.
The major heat-shock protein (hsp70) gene family: related sequences in mouse, *Drosophila*, and yeast
L.A. MORAN, M. CHAUVIN, M.E. KENNEDY, M. KORRI, D.G. LOWE, R.C. NICHOLSON, and M.D. PERRY **488**

Cheifetz, R.
Posttranslational modification of prothyroid hormone
M.C. EGGO, D. DRUCKER, R. CHEIFETZ, and G.N. BURROW **662**

Chen, T.T.
Identification and characterization of estrogen-responsive gene products in the liver of rainbow trout
THOMAS T. CHEN **802**

Cheng, K.-H.
Thermotropic lipid and protein transitions in Chinese hamster lung cell membranes: relationship to hyperthermic cell killing
JAMES R. LEPOCK, KWAN-HON CHENG, HISHAM AL-QYSI, and JACK KRUUV **421**

Chong, K.S.
Characterization of lecithin – cholesterol acyltransferase from human plasma.3. Chemical properties of the enzyme
KUI SONG CHONG, MEHRNOOSH JAHANI, SHINICHI HARA, and ANDRAS G. LACKO **875**

Choy, F.Y.M.
Survey, purification, and properties of sugar phosphate phosphohydrolase among microorganisms
FRANCIS Y.M. CHOY and YA-PIN LEE **1292**

Chrétien, M.
Primary structure determination of *Escherichia coli* heat-stable enterotoxin of porcine origin
CLAUDE LAZURE, NABIL G. SEIDAH, MICHEL CHRÉTIEN, RÉAL LALLIER, and SERGE ST-PIERRE **287**

Cell-free synthesis of porcine proopiomelanocortin: two distinct primary translation products
G. BOILEAU, F. GOSSARD, N.G. SEIDAH, and M. CHRÉTIEN **333**

Proteases and posttranslational processing of prohormones: a review
CLAUDE LAZURE, NABIL G. SEIDAH, DIDIER PÉLAPRAT, and MICHEL CHRÉTIEN **501**

Chrétien, P.
Relationship between hyperthermia-induced heat-shock proteins and thermotolerance in Morris hepatoma cells
J. LANDRY and P. CHRÉTIEN **428**

Chudzik, J.
Phosphatidylinositol movement between isolated microsomal and mitochondrial membranes
J. CHUDZIK and N.Z. STANACEV **1282**

Clark, A.F.
Rat prostatic acid phosphatase: androgenic control of isoelectric focusing patterns
J. DOWNEY, D. MAHAN, T.G. FLYNN, C.E. BIRD, and A.F. CLARK **744**

Clay, M.G.
Removal of *O*-acetylated sialic acids from rat colonic epithelial glycoproteins by cell-free extracts of rat faeces
H. POON, P.E. REID, C.W. RAMEY, W.L. DUNN, and M.G. CLAY **868**

Cohen, S.
Comparison of glucagon, cAMP, and cGMP effects on lipogenesis in hepatocytes
LAWRENCE J. HAYDEN, STEVEN COHEN, KERRY LEVIN, and SIMEON MARGOLIS **207**

Conn, A.R.
Effect of high fat and high sucrose feeding on lipogenesis by isolated rat intestinal cells
A.C. WILSON, R.C. GOLDSTEIN, A.R. CONN, and P.T. KUO **340**

Connelly, P.W.
Influence of divalent cations on rat apolipoprotein transfer to synthetic lipoproteinlike lipid emulsions *in vitro*
PHILIP W. CONNELLY and ARNIS KUKSIS **63**

Adsorption of rat plasma phosphorylcholine-binding protein to synthetic lipid emulsions in the presence of divalent cations
PHILIP W. CONNELLY, ARNIS KUKSIS, SAILEN MOOKERJEA, and ARUN NAGPURKAR **1002**

Coolbear, T.
Key role of dolichol phosphate in glycoprotein biosynthesis
SAILEN MOOKERJEA, TIMOTHY COOLBEAR, and MOHAN LAL SARKAR **1032**

Cooper, K.E.
Peptide neurohormones: their role in thermoregulation and fever
W.D. Ruwe, W.L. Veale, and K.E. Cooper **579**

Coquil, J.F.
Rapid activation of cAMP phosphodiesterase in rat platelets
P. Hamet, D.J. Franks, J. Tremblay, and J.F. Coquil **1158**

Corson, D.C.
An optical stopped-flow and ^{1}H and ^{113}Cd nuclear magnetic resonance study of the kinetics and stoichiometry of the interaction of the lanthanide Yb^{3+} with carp parvalbumin
David C. Corson, Lana Lee, Gerard A. McQuaid, and
Brian D. Sykes **860**

Courgeon, A.M.
The possible role of the superoxide ion in the induction of heat-shock and specific proteins in aerobic *Drosophila* cells during return to normoxia after a period of anaerobiosis
M. Ropp, A.M. Courgeon, R. Calvayrac, and
M. Best-Belpomme **456**

Crawford, T.
Characteristics of chondroitin sulfate proteoglycans of differentiating nonchondrogenic tissues
Terry Crawford **1251**

Cullis, P.R.
Polymorphism of phosphatidylethanolamine–phosphatidylserine model systems: influence of cholesterol and Mg^{2+} on Ca^{+}-triggered bilayer to hexagonal (H_{II}) transitions
M.B. Bally, C.P.S. Tilcock, M.J. Hope, and
P.R. Cullis **346**

Cunningham, T.
Comparison of the effects of heat shock and metal-ion stress on gene expression in cells undergoing myogenesis
Burr G. Atkinson, Tanja Cunningham, Rob L. Dean,
and Martin Somerville **404**

Currie, R.W.
Characterization of the synthesis and accumulation of a 71-kilodalton protein induced in rat tissues after hyperthermia
R. William Currie and Fredric P. White **438**

Cushley, R.J.
An electron spin resonance spectral study of the dynamics of spin-labelled fatty acids bound to oxidoreductases
Jenifer Thewalt, Tenkasi S. Viswanathan, and
Robert J. Cushley **144**

Davey, K.G.
Juvenile hormone increases ouabain-binding capacity of microsomal preparations from vitellogenic follicle cells
T.T. Ilenchuk and K.G. Davey **826**

Davies, B.H.
The triterpenoid carotenoids and related terpenoids in *Staphylococcus aureus* 209P
Richard F. Taylor and Brian H. Davies **892**

Dean, R.L.
Comparison of the effects of heat shock and metal-ion stress on gene expression in cells undergoing myogenesis
Burr G. Atkinson, Tanja Cunningham, Rob L. Dean,
and Martin Somerville **404**

The acquisition of thermal tolerance in larvae of *Calpodes ethlius* (Lepidoptera) and the *in situ* and *in vitro* synthesis of heat-shock proteins
Rob L. Dean and Burr G. Atkinson **472**

DeLucia, A.J.
Plasma and liver carnitine (free and esterified) levels and their interrelationships in moderately hypercholesterolemic monkeys (*Macaca arctoides*)
Frank P. Bell and Anthony J. DeLucia **328**

Demmer, W.
Some properties of aminopeptidase associated with rat brain cortical synaptosomes
William W.-C. Chan, Wolfgang Demmer, and
Karl Brand **1185**

de Silva, S.O.
Antibodies to indolealkylamines II: site of conjugation of melatonin to protein using formaldehyde
L.J. Grota, V. Snieckus, S.O. de Silva, and
G.M. Brown **1096**

Dhanani, N.
Activation and decay of the rat mast cells and its relationship to calcium uptake
Rubina Lewis, Nusrat Dhanani, and N.S. Ranadive **72**

DiBattista, J.A.
Further studies on the corticosteroid-receptor system of the nasal gland of the domestic duck (*Anas platyrhynchos*)
Thomas Sandor, Afzal Z. Mehdi, and
John A. DiBattista **731**

Dodd, J.G.
Sequences complementary to cellular deoxypolypyrimidines are localized in the 3′ end of L-cell mRNA
Janice Green Dodd and Neil A. Straus **1123**

Downey, J.
Rat prostatic acid phosphatase: androgenic control of isoelectric focusing patterns
J. Downey, D. Mahan, T.G. Flynn, C.E. Bird, and
A.F. Clark **744**

Drapeau, P.
Changes in Na^{+}-ATPase and Na,K-pump during maturation of sheep reticulocytes
Rhoda Blostein, Pierre Drapeau, Stephen Benderoff,
and Andrew M. Weigensberg **23**

Drucker, D.
Posttranslational modification of prothyroid hormone
M.C. Eggo, D. Drucker, R. Cheifetz, and
G.N. Burrow **662**

Dubé, J.Y.
Effect of testicular hormones on synthesis of soluble proteins by dog prostate slices
Jean Y. Dubé, Pierre Chapdelaine, and
Roland R. Tremblay **756**

Dunn, W.L.
Removal of *O*-acetylated sialic acids from rat colonic epithelial glycoproteins by cell-free extracts of rat faeces
H. Poon, P.E. Reid, C.W. Ramey, W.L. Dunnn, and
M.G. Clay **868**

Dupuis, G.
Synthesis of two photoreactive heterobifunctional reagents derived from hexanoic acid
GILLES DUPUIS and FAROUK RADWAN **99**

Eggo, M.C.
Posttranslational modification of prothyroid hormone
M.C. EGGO, D. DRUCKER, R. CHEIFETZ, and G.N. BURROW **662**

Elce, J.S.
Acrosin: immunochemical demonstration of multiple forms generated from bovine and human proacrosin
JOHN S. ELCE and ELISE J. MCINTYRE **989**

Epand, R.M.
The biological activity of glucagon–phospholipid complexes
J.J. LIEPNIEKS, P. STOSKOPF, E.A. CARREY, C. PROSSER, and R.M. EPAND **688**

Fellows, G.F.
Cellular distribution of enzymes involved in phosphatidylcholine synthesis in developing rat lung
FRANK CHAN, PAUL G.R. HARDING, TANYA WONG, G. FRAZER FELLOWS, and FRED POSSMAYER **107**

Fernstrom, M.A.
Regulation of oxytocin receptor concentration in rat uterine explants by estrogen and progesterone
MELVYN S. SOLOFF, MATS AXEL FERNSTROM, SUMUDRA PERIYASAMY, SOLWEIG SOLOFF, SAM BALDWIN, and MICHAEL WIEDER **625**

Ferrante, G.
Influence of temperature and growth phase on desaturase activity of the mesophilic yeast *Candida lipolytica*
G. FERRANTE, Y. OHNO, and M. KATES **171**

Pathways for desaturation of oleoyl chains in *Candida lipolytica*
G. FERRANTE and M. KATES **1191**

Fleming, B.D.
Thermotropic mesomorphism in aqueous dispersions of 1-palmitoyl-2-oleoyl- and 1,2-dilauroyl-phosphatidylglycerols in the presence of excess Na^+ or Ca^{2+}
BLAIR D. FLEMING and KEVIN M.W. KEOUGH **882**

Flynn, T.G.
Rat prostatic acid phosphatase: androgenic control of isoelectric focusing patterns
J. DOWNEY, D. MAHAN, T.G. FLYNN, C.E. BIRD, and A.F. CLARK **744**

Fontaine, J.J.
Distribution of elongation factor 2 between particulate and soluble fractions of the brine shrimp *Artemia* during early development
Z. YABLONKA-REUVENI, J.J. FONTAINE, and A.H. WARNER **833**

Fraga, S.
Theoretical simulation of ionic transport through a transmembrane channel
SERAFIN FRAGA and S.H.M. NILAR **856**

Francis, M.McD.
Purification and characterization of a membrane-associated testosterone-binding protein from *Pseudomonas testosteroni*
MIKE MCD. FRANCIS and MAMORU WATANABE **307**

Franks, D.J.
Rapid activation of cAMP phosphodiesterase in rat platelets
P. HAMET, D.J. FRANKS, J. TREMBLAY, and J.F. COQUIL **1158**

Fraser, N.L.
Improved purification of β-galactosidase from rabbit brain: two separable fractions share kinetic and structural properties
NANCY L. FRASER, DONALD MAHURAN, STUART J. FREEMAN, and JOHN W. CALLAHAN **313**

Freeman, S.J.
Improved purification of β-galactosidase from rabbit brain: two separable fractions share kinetic and structural properties
NANCY L. FRASER, DONALD MAHURAN, STUART J. FREEMAN, and JOHN W. CALLAHAN **313**

Fritz, I.B.
Hormonal influences on formation of plasminogen activator by cultured testis tubule segments at defined stages of the cycle of the seminiferous epithelium
IRVING B. FRITZ and KATHERINE KARMALLY **553**

Fryer, J.
Isolation, analysis of structure, synthesis, and biological actions of urotensin I neuropeptides
K. LEDERIS, A. LETTER, D. MCMASTER, T. ICHIKAWA, K.L. MACCANNELL, Y. KOBAYASHI, J. RIVIER, C. RIVIER, W. VALE, and J. FRYER **602**

Fuchs, A.-R.
Systemic and local regulation of oxytocin receptors in the rat uterus, and their functional significance
A.-R. FUCHS, S. PERIYASAMY, and M.S. SOLOFF **615**

Gaertner, R.R.W.
The *in vitro* inhibition of hepatic ferrochelatase by divalent lead and other soft metal ions
REIMER R.W. GAERTNER and BRYAN R. HOLLEBONE **214**

Gagnon, C.
Enzymatic carboxyl methylation of calcium-binding proteins
CLAUDE GAGNON **921**

Galley, W.C.
Rotational mobility associated with the protein moiety of human serum lipoproteins from tryptophan phosphorescence anisotropy measurements
HEIRYUN KIM and WILLIAM C. GALLEY **46**

Gaunt, M.T.
Differences in the effects of pH on the hydrolytic and transgalactosylic reactions of β-galactosidase (*Escherichia coli*)
R.E. HUBER, M.T. GAUNT, R.L. SEPT, and M.J. BABIAK **198**

Gil-Esteban, C.
Regulation of the androgen receptor in human genital skin fibroblasts, with a review of sex steroid receptor regulation by homologous and heterologous steroids
LEONARD PINSKY, MORRIS KAUFMAN, CARMEN GIL-ESTEBAN, and DATEVIK SUMBULIAN **770**

Gilfix, B.M.
Metabolic labelling of oligosaccharide chains of glycoproteins in a rat myoblast cell line and its lectin resistant mutants
B.M. GILFIX and B.D. SANWAL **1129**

Gleeson, P.
Control of branching during the biosynthesis of asparagine-linked oligosaccharides
HARRY SCHACHTER, SAROJA NARASIMHAN, PAUL GLEESON, and GEORGE VELLA **1049**

Godard, A.
Immunoadsorbent isolation of pregnancy-specific β_1-glycoprotein from maternal serum
BERTRAM W. GRIFFITHS and ANDRÉ GODARD **130**

Goldberg, E.A.
Morphological changes at the basement membrane during some tissue interactions in the integument
M.H. HARDY and E.A. GOLDBERG **957**

Goldstein, R.C.
Effect of high fat and high sucrose feeding on lipogenesis by isolated rat intestinal cells
A.C. WILSON, R.C. GOLDSTEIN, A.R. CONN, and P.T. KUO **340**

Gossard, F.
Cell-free synthesis of porcine proopiomelanocortin: two distinct primary translation products

Comparison of glucagon, cAMP, and cGMP effects on lipogenesis in hepatocytes
LAWRENCE J. HAYDEN, STEVEN COHEN, KERRY LEVIN, and SIMEON MARGOLIS **207**

Hellman, M.
Glycoprotein biosynthesis during the acute-phase response to inflammation
J.C. JAMIESON, H.A. KAPLAN, B.M.R.N.J. WOLOSKI, M. HELLMAN, and K. HAM **1041**

Hemmingsen, S.M.
The relationship of cardiolipin biosynthesis to mitochondrial protein synthesis in *Tetrahymena pyriformis*
SEAN M. HEMMINGSEN, LAURA QUERENGESSER, and PAUL G. YOUNG **223**

Henderson, J.F.
Salvage of circulating hypoxanthine by tissues of the mouse
JAMES D. MOYER and J. FRANK HENDERSON **1153**

Hickie, R.A.
Cations and calmodulin in normal and neoplastic cell growth regulation
ROBERT A. HICKIE, JIANN-W. WEI, LOIS M. BLYTH, DAVID Y.W. WONG, and DAVID J. KLAASSEN **934**

Hodgetts, R.B.
A novel form of DOPA decarboxylase produced in *Drosophila* cells in response to 20-hydroxyecdysone
CHARLOTTE A. SPENCER, BRYN STEVENS, JOHN D. O'CONNOR, and ROSS B. HODGETTS **818**

Hollebone, B.R.
The *in vitro* inhibition of hepatic ferrochelatase by divalent lead and other soft metal ions
REIMER R.W. GAERTNER and BRYAN R. HOLLEBONE **214**

Hollenberg, M.D.
Receptors for insulin and basic somatomedin: immunological and affinity-chromatographic cross-reactivity
GLEN D. ARMSTRONG, MORLEY D. HOLLENBERG, BANANI BHAUMICK, R. MARVIN BALA, and JOSEPH M. MATURO III **650**

Receptors, acceptors, and the action of polypeptide hormones: illustrative studies with epidermal growth factor (urogastrone)
M. O'CONNOR-MCCOURT and M.D. HOLLENBERG **670**

Hope, M.J.
Polymorphism of phosphatidylethanolamine – phosphatidylserine model systems: influence of cholesterol and Mg^{2+} on Ca^{+}-triggered bilayer to hexagonal (H_{II}) transitions
M.B. BALLY, C.P.S. TILCOCK, M.J. HOPE, and P.R. CULLIS **346**

Hsia, J.C.
In vitro binding of propranolol and progesterone to native and desialylated human orosomucoid
ALLAN K.L. WONG and J. CARLETON HSIA **1114**

Hsu, L.-H.
Studies of the biosynthesis and metabolism of rat testicular galactoglycerolipids
LIU-HSIN HSU, RAJAGOPALAN NARASIMHAN, MARK LEVINE, KENNETH H. NORWICH, and ROBERT K. MURRAY **1272**

Huber, R.E.
Differences in the effects of pH on the hydrolytic and transgalactosylic reactions of β-galactosidase (*Escherichia coli*)
R.E. HUBER, M.T. GAUNT, R.L. SEPT, and M.J. BABIAK **198**

Hudson, R.W.
Studies of the nuclear 5α-reductase of human prostatic tissue: comparison of enzyme activities in hyperplastic, malignant, and normal tissues
ROBERT W. HUDSON, PATRICIA M. MOFFITT, and WENDY A. OWENS **750**

Huzel, N.J.
Stripping of proteins from submitochondrial particles of rat skeletal muscle or bovine heart by chemical uncouplers
ESTHER W. YAMADA and NORMAN J. HUZEL **1006**

Ichikawa, T.
Isolation, analysis of structure, synthesis, and biological actions of urotensin I neuropeptides
K. LEDERIS, A. LETTER, D. MCMASTER, T. ICHIKAWA, K.L. MACCANNELL, Y. KOBAYASHI, J. RIVIER, C. RIVIER, W. VALE, and J. FRYER **602**

Ilenchuk, T.T.
Juvenile hormone increases ouabain-binding capacity of microsomal preparations from vitellogenic follicle cells
T.T. ILENCHUK and K.G. DAVEY **826**

Ishibashi, Y.
Isolation of tremerogens *A*-9291-I and *A*-9291-II, novel sex hormones of *Tremella brasiliensis*
YOSHIHIRO ISHIBASHI, YOUJI SAKAGAMI, AKIRA ISOGAI, AKINORI SUZUKI, and ROBERT J. BANDONI **796**

Isogai, A.
Isolation of tremerogens *A*-9291-I and *A*-9291-II, novel sex hormones of *Tremella brasiliensis*
YOSHIHIRO ISHIBASHI, YOUJI SAKAGAMI, AKIRA ISOGAI, AKINORI SUZUKI, and ROBERT J. BANDONI **796**

Jahani, M.
Characterization of lecithin – cholesterol acyltransferase from human plasma.3. Chemical properties of the enzyme
KUI SONG CHONG, MEHRNOOSH JAHANI, SHINICHI HARA, and ANDRAS G. LACKO **875**

Jamieson, J.C.
Glycoprotein biosynthesis during the acute-phase response to inflammation
J.C. JAMIESON, H.A. KAPLAN, B.M.R.N.J. WOLOSKI, M. HELLMAN, and K. HAM **1041**

Jellinck, P.H.
Estrogen – androgen interaction: selective inhibition of estrogen-induced uterine peroxidase by testosterone and 5α-dihydrotestosterone
PETER H. JELLINCK, ANDREW AFFLECK, and ANNE-MARIE NEWCOMBE **779**

Jennings, H.J.
Structural elucidation of the capsular polysaccharide of *Streptococcus pneumoniae* type 9N
KARL-GUNNAR ROSSELL and HAROLD J. JENNINGS **1102**

Erratum: Structural elucidation of the capsular polysaccharide of *Streptococcus pneumoniae* type 9N
KARL-GUNNAR ROSSEL and HAROLD J. JENNINGS **1341**

Johnson, D.J.
Measurement of the absolute synthesis of soluble and insoluble elastin by chick aortic tissue
FRED W. KEELEY and DOROTHY J. JOHNSON **1079**

Johnstone, R.M.
Na^+-independent exchange of amino acids in Ehrlich cells
R.M. JOHNSTONE **165**

Jolicoeur, C.
A ribosomal defect in dystrophic hamsters
C. JOLICOEUR and L. BRAKIER-GINGRAS **1**

Jouve, H.M.
Purification and properties of the *Proteus mirabilis* catalase
HÉLÈNE M. JOUVE, SYLVIE TESSIER, and JEAN PELMONT **8**

Properties of a catalase from a peroxide-resistant mutant of *Proteus mirabilis*
HÉLÈNE M. JOUVE, CHRISTIANE LASAUNIERE, and JEAN PELMONT **1219**

Kaplan, H.
A highly sensitive method for identification of amino termini of proteins: application to multiple forms of poly(C)-avid ribonuclease and 17β-hydroxysteroid dehydrogenase
H. KAPLAN, G. ODA, G.R. ANTOUN, D.G. WILLIAMSON, B. TATTRIE, and E.Z. RABIN **323**

Kaplan, H.A.
Glycoprotein biosynthesis during the acute-phase response to inflammation
J.C. JAMIESON, H.A. KAPLAN, B.M.R.N.J. WOLOSKI, M. HELLMAN, and K. HAM **1041**

Karmally, K.
Hormonal influences on formation of plasminogen activator by cultured testis tubule segments at defined stages of the cycle of the seminiferous epithelium
IRVING B. FRITZ and KATHERINE KARMALLY **553**

Kates, M.
Influence of temperature and growth phase on desaturase activity of the mesophilic yeast *Candida lipolytica*
G. FERRANTE, Y. OHNO, and M. KATES **171**

Pathways for desaturation of oleoyl chains in *Candida lipolytica*
G. FERRANTE and M. KATES **1191**

Kaufman, M.
Regulation of the androgen receptor in human genital skin fibroblasts, with a review of sex steroid receptor regulation by homologous and heterologous steroids
LEONARD PINSKY, MORRIS KAUFMAN, CARMEN GIL-ESTEBAN, and DATEVIK SUMBULIAN **770**

Keeley, F.W.
Measurement of the absolute synthesis of soluble and insoluble elastin by chick aortic tissue
FRED W. KEELEY and DOROTHY J. JOHNSON **1079**

Kennedy, M.E.
The major heat-shock protein (hsp70) gene family: related sequences in mouse, *Drosophila*, and yeast
L.A. MORAN, M. CHAUVIN, M.E. KENNEDY, M. KORRI, D.G. LOWE, R.C. NICHOLSON, and M.D. PERRY **488**

Keough, K.M.W.
Thermotropic mesomorphism in aqueous dispersions of 1-palmitoyl-2-oleoyl- and 1,2-dilauroyl-phosphatidylglycerols in the presence of excess Na^+ or Ca^{2+}
BLAIR D. FLEMING and KEVIN M.W. KEOUGH **882**

Ketola-Pirie, C.A.
Cold- and heat-shock induction of new gene expression in cultured amphibian cells
C.A. KETOLA-PIRIE and BURR G. ATKINSON **462**

Kim, H.
Rotational mobility associated with the protein moiety of human serum lipoproteins from tryptophan phosphorescence anisotropy measurements
HEIRYUN KIM and WILLIAM C. GALLEY **46**

Kim, S.
Metabolism of N^G-monomethyl-L-arginine
WOON KI PAIK, MAGID ABOU-GHARBIA, DANIEL SWERN, PRABHAKAR LOTLIKAR, and SANGDUK KIM **850**

Klaassen, D.J.
Cations and calmodulin in normal and neoplastic cell growth regulation
ROBERT A. HICKIE, JIANN-W. WEI, LOIS M. BLYTH, DAVID Y.W. WONG, and DAVID J. KLAASSEN **934**

Klassen, G.R.
Identification and physical characterization of a Col E1 hybrid plasmid containing a catalase gene of *Escherichia coli*
PETER C. LOEWEN, BARBARA L. TRIGGS, GLEN R. KLASSEN, and JOEL H. WEINER **1315**

Klip, A.
Insulin binding to differentiating muscle cells in culture
AMIRA KLIP, GRACE LI, and DENISE WALKER **644**

Kobayashi, Y.
Isolation, analysis of structure, synthesis, and biological actions of urotensin I neuropeptides
K. LEDERIS, A. LETTER, D. MCMASTER, T. ICHIKAWA, K.L. MACCANNELL, Y. KOBAYASHI, J. RIVIER, C. RIVIER, W. VALE, and J. FRYER **602**

Korri, M.
The major heat-shock protein (hsp70) gene family: related sequences in mouse, *Drosophila*, and yeast
L.A. MORAN, M. CHAUVIN, M.E. KENNEDY, M. KORRI, D.G. LOWE, R.C. NICHOLSON, and M.D. PERRY **488**

Kramer, R.E.
Cholesterol metabolism in the rat adrenal cortex: acute temporal changes following stress
JOSEPHINE ALFANO, ROBERT C. PEDERSEN, ROBERT E. KRAMER, and ALEXANDER C. BROWNIE **708**

Krawetz, S.A.
In vitro translation of elastin mRNA and processing of the translated products and the signal sequence of elastin *a*
STEPHEN A. KRAWETZ, A. SAMPATH NARAYANAN, and RASHID A. ANWAR **274**

Kruuv, J.
Thermotropic lipid and protein transitions in Chinese hamster lung cell membranes: relationship to hyperthermic cell killing
JAMES R. LEPOCK, KWAN-HON CHENG, HISHAM AL-QYSI, and JACK KRUUV **421**

Kuhn, D.E.
Aspects of hepatic cholesterol metabolism in normal and dystrophic chicken embryos
D.E. KUHN and D.M. LOGAN **378**

Kuksis, A.
Influence of divalent cations on rat apolipoprotein transfer to synthetic lipoproteinlike lipid emulsions *in vitro*
PHILIP W. CONNELLY and ARNIS KUKSIS **63**

Erratum: Expansion of phospholipid pool size of rat intestinal villus cells during fat absorption
N.A. SHAIKH and A. KUKSIS **229**

Further evidence for enhanced phospholipid synthesis by rat jejunal villus cells during fat absorption
N.A. SHAIKH and A. KUKSIS **370**

Analysis of triacylglycerols by reversed-phase high pressure liquid chromatography with direct liquid inlet mass spectrometry
L. MARAI, J.J. MYHER, and A. KUKSIS **840**

Adsorption of rat plasma phosphorylcholine-binding protein to synthetic lipid emulsions in the presence of divalent cations
PHILIP W. CONNELLY, ARNIS KUKSIS, SAILEN MOOKERJEA, and ARUN NAGPURKAR **1002**

Kuo, P.T.
Effect of high fat and high sucrose feeding on lipogenesis by isolated rat intestinal cells
A.C. WILSON, R.C. GOLDSTEIN, A.R. CONN, and P.T. KUO **340**

Labrie, F.
Multiple hormonal control of pars intermedia cell activity
H. MEUNIER and F. LABRIE **516**

Lacko, A.G.
Characterization of lecithin – cholesterol acyltransferase from human plasma.3. Chemical properties of the enzyme

Meighen, E.
Mechanism of a long-chain fatty aldehyde dehydrogenase induced during the development of bioluminescence in *Beneckea harveyi*
ANDREW BOGNAR and EDWARD MEIGHEN **301**

Meunier, H.
Multiple hormonal control of pars intermedia cell activity
H. MEUNIER and F. LABRIE **516**

Mezl, V.A.
Distribution of rat α-lactalbumin and casein mRNA between polyadenylated and nonpolyadenylated RNA
SUSAN NADIN-DAVIS and VASEK A. MEZL **353**

Identification and optimization of the effects of endogenous free amino acids on the translational activity of the wheat germ cell-free system
VASEK A. MEZL **1090**

Miller, R.W.
Cytoplasmic membrane of *Rhizobium meliloti* bacteroids. I. Alterations in lipid composition, physical properties, and respiratory proteins
R.W. MILLER and P.A. TREMBLAY **1334**

Minocherhomjee, A.-E-V.M.
Pharmacological antagonism of calmodulin
BASIL D. ROUFOGALIS, ARDA-E-VIRAF M. MINOCHERHOMJEE, and AMEERA AL-JOBORE **927**

Moffitt, P.M.
Studies of the nuclear 5α-reductase of human prostatic tissue: comparison of enzyme activities in hyperplastic, malignant, and normal tissues
ROBERT W. HUDSON, PATRICIA M. MOFFITT, and WENDY A. OWENS **750**

Mookerjea, S.
Adsorption of rat plasma phosphorylcholine-binding protein to synthetic lipid emulsions in the presence of divalent cations
PHILIP W. CONNELLY, ARNIS KUKSIS, SAILEN MOOKERJEA, and ARUN NAGPURKAR **1002**

Key role of dolichol phosphate in glycoprotein biosynthesis
SAILEN MOOKERJEA, TIMOTHY COOLBEAR, and MOHAN LAL SARKAR **1032**

Moore, G.J.
Biosynthesis of neurohypophysial hormones: historical and current events
GRAHAM J. MOORE and JOSEPH C. ROSENIOR **594**

Moran, L.A.
The major heat-shock protein (hsp70) gene family: related sequences in mouse, *Drosophila*, and yeast
L.A. MORAN, M. CHAUVIN, M.E. KENNEDY, M. KORRI, D.G. LOWE, R.C. NICHOLSON, and M.D. PERRY **488**

Moyer, J.D.
Salvage of circulating hypoxanthine by tissues of the mouse
JAMES D. MOYER and J. FRANK HENDERSON **1153**

Mukherjee, M.
Studies on TI-2 trypsin inhibitor of *Streptomyces griseus*
MINA MUKHERJEE **1228**

Murray, R.K.
Studies of the biosynthesis and metabolism of rat testicular galactoglycerolipids
LIU-HSIN HSU, RAJAGOPALAN NARASIMHAN, MARK LEVINE, KENNETH H. NORWICH, and ROBERT K. MURRAY **1272**

Mutus, B.
On the mechanism of interaction between calmodulin and calmodulin-dependent proteins
KUO CHIEH WANG, BULENT MUTUS, RAJENDRA K. SHARMA, HING-YAT PETER LAM, and JERRY H. WANG **911**

Myher, J.J.
Analysis of triacylglycerols by reversed-phase high pressure liquid chromatography with direct liquid inlet mass spectrometry
L. MARAI, J.J. MYHER, and A. KUKSIS **840**

Nadeau, D.
Sequential isolation of lamellar bodies and surfactant fractions from rat lungs
J. BOUDREAU, A.R. BEAUDOIN, and D. NADEAU **231**

Nadin-Davis, S.
Distribution of rat α-lactalbumin and casein mRNA between polyadenylated and nonpolyadenylated RNA
SUSAN NADIN-DAVIS and VASEK A. MEZL **353**

Nagpurkar, A.
Adsorption of rat plasma phosphorylcholine-binding protein to synthetic lipid emulsions in the presence of divalent cations
PHILIP W. CONNELLY, ARNIS KUKSIS, SAILEN MOOKERJEA, and ARUN NAGPURKAR **1002**

Narasimhan, R.
Studies of the biosynthesis and metabolism of rat testicular galactoglycerolipids
LIU-HSIN HSU, RAJAGOPALAN NARASIMHAN, MARK LEVINE, KENNETH H. NORWICH, and ROBERT K. MURRAY **1272**

Narasimhan, S.
Control of branching during the biosynthesis of asparagine-linked oligosaccharides
HARRY SCHACHTER, SAROJA NARASIMHAN, PAUL GLEESON, and GEORGE VELLA **1049**

Narayanan, A.S.
In vitro translation of elastin mRNA and processing of the translated products and the signal sequence of elastin *a*
STEPHEN A. KRAWETZ, A. SAMPATH NARAYANAN, and RASHID A. ANWAR **274**

Newcombe, A.-M.
Estrogen – androgen interaction: selective inhibition of estrogen-induced uterine peroxidase by testosterone and 5α-dihydrotestosterone
PETER H. JELLINCK, ANDREW AFFLECK, and ANNE-MARIE NEWCOMBE **779**

Nicholson, R.C.
The major heat-shock protein (hsp70) gene family: related sequences in mouse, *Drosophila*, and yeast
L.A. MORAN, M. CHAUVIN, M.E. KENNEDY, M. KORRI, D.G. LOWE, R.C. NICHOLSON, and M.D. PERRY **488**

Nilar, S.H.M.
Theoretical simulation of ionic transport through a transmembrane channel
SERAFIN FRAGA and S.H.M. NILAR **856**

Nordlie, R.C.
Glucose-6-phosphatase: is activity regulated by phosphorylation – dephosphorylation?
JASBIR SINGH, RICHARD E. MARTIN, and ROBERT C. NORDLIE **1085**

Norwich, K.H.
Studies of the biosynthesis and metabolism of rat testicular galactoglycerolipids
LIU-HSIN HSU, RAJAGOPALAN NARASIMHAN, MARK LEVINE, KENNETH H. NORWICH, and ROBERT K. MURRAY **1272**

O'Connor, J.D.
A novel form of DOPA decarboxylase produced in *Drosophila* cells in response to 20-hydroxyecdysone
CHARLOTTE A. SPENCER, BRYN STEVENS, JOHN D. O'CONNOR, and ROSS B. HODGETTS **818**

O'Connor-McCourt, M.
Receptors, acceptors, and the action of polypeptide hormones: illustrative studies with epidermal growth factor (urogastrone)
M. O'CONNOR-MCCOURT and M.D. HOLLENBERG **670**

Oda, G.
A highly sensitive method for identification of amino termini of proteins: application to multiple forms of poly(C)-avid ribonuclease and 17β-hydroxysteroid dehydrogenase
H. KAPLAN, G. ODA, G.R. ANTOUN, D.G. WILLIAMSON, B. TATTRIE, and E.Z. RABIN **323**

Ohno, Y.
Influence of temperature and growth phase on desaturase activity of the mesophilic yeast *Candida lipolytica*
G. FERRANTE, Y. OHNO, and M. KATES **171**

Orr, J.
Mucin synthesis. III. UDP-GlcNAc:Galβ1-3(GlcNAcβ1-6)GalNAc-R (GlcNAc to Gal) β3-*N*-acetylglucosaminyltransferase, an enzyme in porcine gastric mucosa involved in the elongation of mucin-type oligosaccharides
INKA BROCKHAUSEN, DAVID WILLIAMS, KHUSHI L. MATTA, JEANNE ORR, and HARRY SCHACHTER **1322**

Owens, W.A.
Studies of the nuclear 5α-reductase of human prostatic tissue: comparison of enzyme activities in hyperplastic, malignant, and normal tissues
ROBERT W. HUDSON, PATRICIA M. MOFFITT, and WENDY A. OWENS **750**

Pace-Asciak, C.R.
Release of prostaglandins from intact fetal lamb ductus arteriosus
C.R. PACE-ASCIAK and G. RANGARAJ **240**

Paik, W.K.
Metabolism of N^G-monomethyl-L-arginine
WOON KI PAIK, MAGID ABOU-GHARBIA, DANIEL SWERN, PRABHAKAR LOTLIKAR, and SANGDUK KIM **850**

Patel, B.A.
Immunologic similarity of insulin receptors in Golgi and plasma membranes from rat liver
B.A. PATEL and B.I. POSNER **657**

Pedersen, R.C.
Cholesterol metabolism in the rat adrenal cortex: acute temporal changes following stress
JOSEPHINE ALFANO, ROBERT C. PEDERSEN, ROBERT E. KRAMER, and ALEXANDER C. BROWNIE **708**

Pekkala, D.
Effect of heat shock on synthesis and phosphorylation of nuclear and cytoplasmic proteins in the fungus *Achlya*
JULIE C. SILVER, DIANE R. ANDREWS, and DAVID PEKKALA **447**

Pélaprat, D.
Proteases and posttranslational processing of prohormones: a review
CLAUDE LAZURE, NABIL G. SEIDAH, DIDIER PÉLAPRAT, and MICHEL CHRÉTIEN **501**

Pelech, S.L.
Activities of the phosphatidylcholine biosynthetic enzymes in rat liver during development
STEVEN L. PELECH, ELLEN POWER, and DENNIS E. VANCE **1147**

Pelmont, J.
Purification and properties of the *Proteus mirabilis* catalase
HÉLÈNE M. JOUVE, SYLVIE TESSIER, and JEAN PELMONT **8**

Properties of a catalase from a peroxide-resistant mutant of *Proteus mirabilis*
HÉLÈNE M. JOUVE, CHRISTIANE LASAUNIERE, and JEAN PELMONT **1219**

Periyasamy, S.
Systemic and local regulation of oxytocin receptors in the rat uterus, and their functional significance
A.-R. FUCHS, S. PERIYASAMY, and M.S. SOLOFF **615**

Regulation of oxytocin receptor concentration in rat uterine explants by estrogen and progesterone
MELVYN S. SOLOFF, MATS AXEL FERNSTROM, SUMUDRA PERIYASAMY, SOLWEIG SOLOFF, SAM BALDWIN, and MICHAEL WIEDER **625**

Perry, M.B.
The specific capsular polysaccharide of *Streptococcus pneumoniae* type 20
JAMES C. RICHARDS, MALCOLM B. PERRY, and DENNIS J. CARLO **178**

Perry, M.D.
The major heat-shock protein (hsp70) gene family: related sequences in mouse, *Drosophila*, and yeast
L.A. MORAN, M. CHAUVIN, M.E. KENNEDY, M. KORRI, D.G. LOWE, R.C. NICHOLSON, and M.D. PERRY **488**

Pinsky, L.
Regulation of the androgen receptor in human genital skin fibroblasts, with a review of sex steroid receptor regulation by homologous and heterologous steroids
LEONARD PINSKY, MORRIS KAUFMAN, CARMEN GIL-ESTEBAN, and DATEVIK SUMBULIAN **770**

Pollender, J.-M.
Effect of liver plasma membranes on G-actin. I. Possible implication of membrane NPases in inactivation of G-actin
JULIAN GRUDA, JEAN-MARC POLLENDER, and HELENE-MARIE THÉRIEN **85**

Poon, H.
Removal of *O*-acetylated sialic acids from rat colonic epithelial glycoproteins by cell-free extracts of rat faeces
H. POON, P.E. REID, C.W. RAMEY, W.L. DUNN, and M.G. CLAY **868**

Posner, B.I.
Immunologic similarity of insulin receptors in Golgi and plasma membranes from rat liver
B.A. PATEL and B.I. POSNER **657**

Possmayer, F.
Cellular distribution of enzymes involved in phosphatidylcholine synthesis in developing rat lung
FRANK CHAN, PAUL G.R. HARDING, TANYA WONG, G. FRAZER FELLOWS, and FRED POSSMAYER **107**

Power, E.
Activities of the phosphatidylcholine biosynthetic enzymes in rat liver during development
STEVEN L. PELECH, ELLEN POWER, and DENNIS E. VANCE **1147**

Prosser, C.
The biological activity of glucagon – phospholipid complexes
J.J. LIEPNIEKS, P. STOSKOPF, E.A. CARREY, C. PROSSER, and R.M. EPAND **688**

Querengesser, L.
The relationship of cardiolipin biosynthesis to mitochondrial protein synthesis in *Tetrahymena pyriformis*
SEAN M. HEMMINGSEN, LAURA QUERENGESSER, and PAUL G. YOUNG **223**

Rabin, E.Z.
A highly sensitive method for identification of amino termini of proteins: application to multiple forms of poly(C)-avid ribonuclease and 17β-hydroxysteroid dehydrogenase
H. KAPLAN, G. ODA, G.R. ANTOUN, D.G. WILLIAMSON, B. TATTRIE, and E.Z. RABIN **323**

Radwan, F.
Synthesis of two photoreactive heterobifunctional reagents derived from hexanoic acid
GILLES DUPUIS and FAROUK RADWAN **99**

Raeside, J.I.
The formation of unconjugated and sulfoconjugated estrogens by Leydig cells of the boar testis
J.I. RAESIDE **790**

Rahal, S.
Progesterone C21 hydroxylation and steroid carboxylic acid biosynthesis in the rabbit. *In vitro* studies with endocrine, metabolic, and potential target tissues
I.R. SENCIALL, G. BULLOCK, and S. RAHAL **722**

Ramey, C.W.
Removal of *O*-acetylated sialic acids from rat colonic epithelial glycoproteins by cell-free extracts of rat faeces
H. POON, P.E. REID, C.W. RAMEY, W.L. DUNN, and M.G. CLAY **868**

Ranadive, N.S.
Activation and decay of the rat mast cells and its relationship to calcium uptake
RUBINA LEWIS, NUSRAT DHANANI, and N.S. RANADIVE **72**

Extracellular effect of calcium on compound 48/80 stimulated mast cells
NARENDRANATH S. RANADIVE and RUBINA LEWIS **79**

Rangaraj, G.
Release of prostaglandins from intact fetal lamb ductus arteriosus
C.R. PACE-ASCIAK and G. RANGARAJ **240**

Reid, P.E.
Removal of *O*-acetylated sialic acids from rat colonic epithelial glycoproteins by cell-free extracts of rat faeces
H. POON, P.E. REID, C.W. RAMEY, W.L. DUNN, and M.G. CLAY **868**

Richards, J.C.
The specific capsular polysaccharide of *Streptococcus pneumoniae* type 20
JAMES C. RICHARDS, MALCOLM B. PERRY, and DENNIS J. CARLO **178**

Rip, J.W.
Distribution and metabolism of dolichol and dolichyl phosphate in rat liver
JACK W. RIP, NILABH CHAUDHARY, and KENNETH K. CARROLL **1025**

Rivier, C.
Isolation, analysis of structure, synthesis, and biological actions of urotensin I neuropeptides
K. LEDERIS, A. LETTER, D. MCMASTER, T. ICHIKAWA, K.L. MACCANNELL, Y. KOBAYASHI, J. RIVIER, C. RIVIER, W. VALE, and J. FRYER **602**

Rivier, J.
Isolation, analysis of structure, synthesis, and biological actions of urotensin I neuropeptides
K. LEDERIS, A. LETTER, D. MCMASTER, T. ICHIKAWA, K.L. MACCANNELL, Y. KOBAYASHI, J. RIVIER, C. RIVIER, W. VALE, and J. FRYER **602**

Roncari, D.A.K.
Effects of glucocorticoid hormones on lipid-synthetic enzymes from different adipose tissue regions and from liver
DAVID C.W. LAU and DANIEL A.K. RONCARI **1245**

Ropp, M.
The possible role of the superoxide ion in the induction of heat-shock and specific proteins in aerobic *Drosophila* cells during return to normoxia after a period of anaerobiosis
M. ROPP, A.M. COURGEON, R. CALVAYRAC, and M. BEST-BELPOMME **456**

Rorstad, O.P.
Somatostatin radioreceptor assay: development and application to the measurement of somatostatinlike activity in the rat central nervous system
O.P. RORSTAD, A. SCHONBRUNN, and J.B. MARTIN **532**

Rosenior, J.C.
Biosynthesis of neurohypophysial hormones: historical and current events
GRAHAM J. MOORE and JOSEPH C. ROSENIOR **594**

Rossell, K.-G.
Structural elucidation of the capsular polysaccharide of *Streptococcus pneumoniae* type 9N
KARL-GUNNAR ROSSELL and HAROLD J. JENNINGS **1102**

Erratum: Structural elucidation of the capsular polysaccharide of *Streptococcus pneumoniae* type 9N
KARL-GUNNAR ROSSELL and HAROLD J. JENNINGS **1341**

Rotin, D.
The possible role of juvenile hormone esterase in the regulation of juvenile hormone titre in the female cockroach *Diploptera punctata*
DANIELA ROTIN and STEPHEN S. TOBE **811**

Roufogalis, B.D.
Pharmacological antagonism of calmodulin
BASIL D. ROUFOGALIS, ARDA-E-VIRAF M. MINOCHERHOMJEE, and AMEERA AL-JOBORE **927**

Ruwe, W.D.
Peptide neurohormones: their role in thermoregulation and fever
W.D. RUWE, W.L. VEALE, and K.E. COOPER **579**

Sairam, M.R.
Studies on primate gonadotropin receptors: comparison of follitropin and lutropin receptors in human testis
M.I. BERMAN and M.R. SAIRAM **561**

Sakagami, Y.
Isolation of tremerogens *A*-9291-I and *A*-9291-II, novel sex hormones of *Tremella brasiliensis*
YOSHIHIRO ISHIBASHI, YOUJI SAKAGAMI, AKIRA ISOGAI, AKINORI SUZUKI, and ROBERT J. BANDONI **796**

Sanders, E.J.
Recent progress towards understanding the roles of the basement membrane in development
E.J. SANDERS **949**

Sandor, T.
Further studies on the corticosteroid-receptor system of the nasal gland of the domestic duck (*Anas platyrhynchos*)
THOMAS SANDOR, AFZAL Z. MEHDI, and JOHN A. DIBATTISTA **731**

Sanwal, B.D.
Metabolic labelling of oligosaccharide chains of glycoproteins in a rat myoblast cell line and its lectin resistant mutants
B.M. GILFIX and B.D. SANWAL **1129**

Sarkar, M.L.
Key role of dolichol phosphate in glycoprotein biosynthesis
SAILEN MOOKERJEA, TIMOTHY COOLBEAR, and MOHAN LAL SARKAR **1032**

Schachter, H.
Control of branching during the biosynthesis of asparagine-linked oligosaccharides
HARRY SCHACHTER, SAROJA NARASIMHAN, PAUL GLEESON, and GEORGE VELLA **1049**

Mucin synthesis. III. UDP-GlcNAc:Galβ1-3(GlcNAcβ1-6)GalNAc-R (GlcNAc to Gal) β3-*N*-acetylglucosaminyltransferase, an enzyme in porcine gastric mucosa involved in the elongation of mucin-type oligosaccharides
INKA BROCKHAUSEN, DAVID WILLIAMS, KHUSHI L. MATTA, JEANNE ORR, and HARRY SCHACHTER **1322**

Schimmer, B.P.
Adenylate cyclase activity in Y1 mouse adrenocortical tumor cells: some properties of the enzyme associated with purified plasma membrane fractions
BERNARD P. SCHIMMER **547**

Schnare, M.N.
Primary structures of four novel small ribosomal RNAs from *Crithidia fasciculata*
MURRAY N. SCHNARE, DAVID F. SPENCER, and MICHAEL W. GRAY **38**

Schonbrunn, A.
Somatostatin radioreceptor assay: development and application to the measurement of somatostatinlike activity in the rat central nervous system
O.P. RORSTAD, A. SCHONBRUNN, and J.B. MARTIN **532**

Scott, P.G.
Macromolecular constituents of basement membranes: a review of current knowledge on their structure and function
PAUL G. SCOTT **942**

Seidah, N.G.
Primary structure determination of *Escherichia coli* heat-stable enterotoxin of porcine origin
CLAUDE LAZURE, NABIL G. SEIDAH, MICHEL CHRÉTIEN, RÉAL LALLIER, and SERGE ST-PIERRE **287**

Cell-free synthesis of porcine proopiomelanocortin: two distinct primary translation products
G. BOILEAU, F. GOSSARD, N.G. SEIDAH, and M. CHRÉTIEN **333**

Proteases and posttranslational processing of prohormones: a review
CLAUDE LAZURE, NABIL G. SEIDAH, DIDIER PÉLAPRAT, and MICHEL CHRÉTIEN **501**

Senciall, I.R.
Progesterone C21 hydroxylation and steroid carboxylic acid biosynthesis in the rabbit. *In vitro* studies with endocrine, metabolic, and potential target tissues
I.R. SENCIALL, G. BULLOCK, and S. RAHAL **722**

Seper, E.I.
Uptake of 17β-estradiol and its conjugates by isolated rabbit liver nuclei
J.H. TONG, E.I. SEPER, D.S. LAYNE, and D.G. WILLIAMSON **784**

Sept, R.L.
Differences in the effects of pH on the hydrolytic and transgalactosylic reactions of β-galactosidase (*Escherichia coli*)
R.E. HUBER, M.T. GAUNT, R.L. SEPT, and M.J. BABIAK **198**

Shaikh, N.A.
Erratum: Expansion of phospholipid pool size of rat intestinal villus cells during fat absorption
N.A. SHAIKH and A. KUKSIS **229**

Further evidence for enhanced phospholipid synthesis by rat jejunal villus cells during fat absorption
N.A. SHAIKH and A. KUKSIS **370**

Sharma, R.K.
On the mechanism of interaction between calmodulin and calmodulin-dependent proteins
KUO CHIEH WANG, BULENT MUTUS, RAJENDRA K. SHARMA, HING-YAT PETER LAM, and JERRY H. WANG **911**

Sherman, I.W.
Developmental modulation of protein synthetic patterns by the human malarial parasite *Plasmodium falciparum*
DAVID R. ALLRED and IRWIN W. SHERMAN **1304**

Shriver, J.W.
2-Fluoro-ATP, a fluorinated ATP analog. ^{19}F nuclear magnetic resonance studies of the 2-fluoro-ADP-myosin subfragment-1 complex
JOHN H. BALDO, POUL E. HANSEN, JOHN W. SHRIVER, and BRIAN D. SYKES **115**

Silver, J.C.
Effect of heat shock on synthesis and phosphorylation of nuclear and cytoplasmic proteins in the fungus *Achlya*
JULIE C. SILVER, DIANE R. ANDREWS, and DAVID PEKKALA **447**

Simpson, E.R.
Regulation by ACTH of steroid hormone biosynthesis in the adrenal cortex
EVAN R. SIMPSON and MICHAEL R. WATERMAN **692**

Singer, S.S.
Enzymatic sulfation of steroids. XVIII. Study of the specific estradiol-17β sulfotransferase of rat liver cytosol, that converts the estrogen to its 3-sulfate, and some elements of the endocrine control of its production
JACALYN M. GREEN and SANFORD S. SINGER **15**

Singh, J.
Glucose-6-phosphatase: is activity regulated by phosphorylation – dephosphorylation?
JASBIR SINGH, RICHARD E. MARTIN, and ROBERT C. NORDLIE **1085**

Siu, C.-H.
Phosphorylation of spore coat proteins of *Dictyostelium discoideum*
TESHOME AKALEHIYWOT and CHI-HUNG SIU **996**

Smale, F.-A.
Regulation of phosphoenolpyruvate carboxykinase during postnatal development in the rat
PETER HAHN and FREDA-ANNE SMALE **683**

Smith, D.D.S.
Methylenetetrahydrofolate dehydrogenase – methenyltetrahydrofolate cyclohydrolase – formyltetrahydrofolate synthetase from porcine liver: evidence to support a common dehydrogenase – cyclohydrolase site
D. Drummond S. Smith and Robert E. MacKenzie **1166**

Snieckus, V.
Antibodies to indolealkylamines II: site of conjugation of melatonin to protein using formaldehyde
L.J. Grota, V. Snieckus, S.O. de Silva, and G.M. Brown **1096**

Snutch, T.P.
Alterations in the pattern of gene expression following heat shock in the nematode *Caenorhabditis elegans*
Terry P. Snutch and David L. Baillie **480**

Soloff, M.S.
Systemic and local regulation of oxytocin receptors in the rat uterus, and their functional significance
A.-R. Fuchs, S. Periyasamy, and M.S. Soloff **615**

Regulation of oxytocin receptor concentration in rat uterine explants by estrogen and progesterone
Melvyn S. Soloff, Mats Axel Fernstrom, Sumudra Periyasamy, Solweig Soloff, Sam Baldwin, and Michael Wieder **625**

Oxytocin receptors in rat involuting mammary gland
Melvyn S. Soloff and Michael H. Wieder **631**

Soloff, S.
Regulation of oxytocin receptor concentration in rat uterine explants by estrogen and progesterone
Melvyn S. Soloff, Mats Axel Fernstrom, Sumudra Periyasamy, Solweig Soloff, Sam Baldwin, and Michael Wieder **625**

Somerville, M.
Comparison of the effects of heat shock and metal-ion stress on gene expression in cells undergoing myogenesis
Burr G. Atkinson, Tanja Cunningham, Rob L. Dean, and Martin Somerville **404**

Spencer, C.A.
A novel form of DOPA decarboxylase produced in *Drosophila* cells in response to 20-hydroxyecdysone
Charlotte A. Spencer, Bryn Stevens, John D. O'Connor, and Ross B. Hodgetts **818**

Spencer, D.F.
Primary structures of four novel small ribosomal RNAs from *Crithidia fasciculata*
Murray N. Schnare, David F. Spencer, and Michael W. Gray **38**

Stanacev, N.Z.
Phosphatidylinositol movement between isolated microsomal and mitochondrial membranes
J. Chudzik and N.Z. Stanacev **1282**

Stevens, B.
A novel form of DOPA decarboxylase produced in *Drosophila* cells in response to 20-hydroxyecdysone
Charlotte A. Spencer, Bryn Stevens, John D. O'Connor, and Ross B. Hodgetts **818**

Stevens, F.C.
Calmodulin: an introduction
Frits C. Stevens **906**

Stockton, J.F.
Identification of nonhistone chromosomal proteins binding specifically to cloned α-fetoprotein DNA sequences
Barry H. Lesser, Helen W.H. Chan, and John F. Stockton **254**

Storey, K.B.
In vivo detection of cryoprotectants and lipids in overwintering larvae using carbon-13 nuclear magnetic resonance spectroscopy
G.W. Buchanan and K.B. Storey **1260**

Stoskopf, P.
The biological activity of glucagon – phospholipid complexes
J.J. Liepnieks, P. Stoskopf, E.A. Carrey, C. Prosser, and R.M. Epand **688**

St-Pierre, S.
Primary structure determination of *Escherichia coli* heat-stable enterotoxin of porcine origin
Claude Lazure, Nabil G. Seidah, Michel Chrétien, Réal Lallier, and Serge St-Pierre **287**

Straus, N.A.
Sequences complementary to cellular deoxypolypyrimidines are localized in the 3′ end of L-cell mRNA
Janice Green Dodd and Neil A. Straus **1123**

Sumbulian, D.
Regulation of the androgen receptor in human genital skin fibroblasts, with a review of sex steroid receptor regulation by homologous and heterologous steroids
Leonard Pinsky, Morris Kaufman, Carmen Gil-Esteban, and Datevik Sumbulian **770**

Suzuki, A.
Isolation of tremerogens *A*-9291-I and *A*-9291-II, novel sex hormones of *Tremella brasiliensis*
Yoshihiro Ishibashi, Youji Sakagami, Akira Isogai, Akinori Suzuki, and Robert J. Bandoni **796**

Swern, D.
Metabolism of N^G-monomethyl-L-arginine
Woon Ki Paik, Magid Abou-Gharbia, Daniel Swern, Prabhakar Lotlikar, and Sangduk Kim **850**

Sykes, B.D.
2-Fluoro-ATP, a fluorinated ATP analog. ^{19}F nuclear magnetic resonance studies of the 2-fluoro-ADP-myosin subfragment-1 complex
John H. Baldo, Poul E. Hansen, John W. Shriver, and Brian D. Sykes **115**

Applications of ^{31}P nuclear magnetic resonance to studies of protein structure and function
Brian D. Sykes **155**

An optical stopped-flow and ^1H and ^{113}Cd nuclear magnetic resonance study of the kinetics and stoichiometry of the interaction of the lanthanide Yb^{3+} with carp parvalbumin
David C. Corson, Lana Lee, Gerard A. McQuaid, and Brian D. Sykes **860**

Takeuchi, K.
Purification and characterization of exo-β-1,3-glucanase from a hatching supernatant of *Strongylocentrotus intermedius*
KIYOSHI TAKEUCHI 54

Tanguay, R.M.
Genetic regulation during heat shock and function of heat-shock proteins: a review
R.M. TANGUAY 387

Expression of histone genes during heat shock and in arsenite-treated *Drosophila* Kc cells
R.M. TANGUAY, R. CAMATO, F. LETTRE, and M. VINCENT 414

Tattrie, B.
A highly sensitive method for identification of amino termini of proteins: application to multiple forms of poly(C)-avid ribonuclease and 17β-hydroxysteroid dehydrogenase
H. KAPLAN, G. ODA, G.R. ANTOUN, D.G. WILLIAMSON, B. TATTRIE, and E.Z. RABIN 323

Taylor, R.F.
The triterpenoid carotenoids and related terpenoids in *Staphylococcus aureus* 209P
RICHARD F. TAYLOR and BRIAN H. DAVIES 892

Tessier, S.
Purification and properties of the *Proteus mirabilis* catalase
HÉLÈNE M. JOUVE, SYLVIE TESSIER, and JEAN PELMONT 8

Thérien, H.-M.
Effect of liver plasma membranes on G-actin. I. Possible implication of membrane NPases in inactivation of G-actin
JULIAN GRUDA, JEAN-MARC POLLENDER, and HELENE-MARIE THÉRIEN 85

Effect of liver plasma membranes on G-actin. II. Fate of actin-bound nucleotide
HELENE-MARIE THÉRIEN and JULIAN GRUDA 93

Thewalt, J.
An electron spin resonance spectral study of the dynamics of spin-labelled fatty acids bound to oxidoreductases
JENIFER THEWALT, TENKASI S. VISWANATHAN, and ROBERT J. CUSHLEY 144

Tilcock, C.P.S.
Polymorphism of phosphatidylethanolamine–phosphatidylserine model systems: influence of cholesterol and Mg^{2+} on Ca^{+}-triggered bilayer to hexagonal (H_{II}) transitions
M.B. BALLY, C.P.S. TILCOCK, M.J. HOPE, and P.R. CULLIS 346

Tobe, S.S.
The possible role of juvenile hormone esterase in the regulation of juvenile hormone titre in the female cockroach *Diploptera punctata*
DANIELA ROTIN and STEPHEN S. TOBE 811

Tong, J.H.
Uptake of 17β-estradiol and its conjugates by isolated rabbit liver nuclei
J.H. TONG, E.I. SEPER, D.S. LAYNE, and D.G. WILLIAMSON 784

Tremblay, J.
Rapid activation of cAMP phosphodiesterase in rat platelets
P. HAMET, D.J. FRANKS, J. TREMBLAY, and J.F. COQUIL 1158

Tremblay, P.A.
Cytoplasmic membrane of *Rhizobium meliloti* bacteroids. I. Alterations in lipid composition, physical properties, and respiratory proteins
R.W. MILLER and P.A. TREMBLAY 1334

Tremblay, R.R.
Effect of testicular hormones on synthesis of soluble proteins by dog prostate slices
JEAN Y. DUBÉ, PIERRE CHAPDELAINE, and ROLAND R. TREMBLAY 756

Presence of α-glucosidases in the male reproductive system of the rat and hormonal influences
ANNE-MARIE GRANDMONT, PIERRE CHAPDELAINE, and ROLAND R. TREMBLAY 764

Triggs, B.L.
Identification and physical characterization of a Col E1 hybrid plasmid containing a catalase gene of *Escherichia coli*
PETER C. LOEWEN, BARBARA L. TRIGGS, GLEN R. KLASSEN, and JOEL H. WEINER 1315

Vale, W.
Isolation, analysis of structure, synthesis, and biological actions of urotensin I neuropeptides
K. LEDERIS, A. LETTER, D. MCMASTER, T. ICHIKAWA, K.L. MACCANNELL, Y. KOBAYASHI, J. RIVIER, C. RIVIER, W. VALE, and J. FRYER 602

Vance, D.E.
Activities of the phosphatidylcholine biosynthetic enzymes in rat liver during development
STEVEN L. PELECH, ELLEN POWER, and DENNIS E. VANCE 1147

Van Exan, R.J.
Epithelial induction of osteogenesis in embryonic chick mandibular mesenchyme: a possible role for basal lamina
R.J. VAN EXAN and B.K. HALL 967

Veale, W.L.
Peptide neurohormones: their role in thermoregulation and fever
W.D. RUWE, W.L. VEALE, and K.E. COOPER 579

Vella, G.
Control of branching during the biosynthesis of asparagine-linked oligosaccharides
HARRY SCHACHTER, SAROJA NARASIMHAN, PAUL GLEESON, and GEORGE VELLA 1049

Vincent, M.
Expression of histone genes during heat shock and in arsenite-treated *Drosophila* Kc cells
R.M. TANGUAY, R. CAMATO, F. LETTRE, and M. VINCENT 414

Viswanathan, T.S.
An electron spin resonance spectral study of the dynamics of spin-labelled fatty acids bound to oxidoreductases
JENIFER THEWALT, TENKASI S. VISWANATHAN, and ROBERT J. CUSHLEY 144

Vogel, H.J.
Phosphorus-31 nuclear magnetic resonance pH titration studies of the phosphoproteins tropomyosin and glycogen phosphorylase *a*
HANS J. VOGEL and WILLIAM A. BRIDGER 363

Wainwright, L.K.
Enzymes of guanine nucleotide metabolism and the diurnal cycle in cGMP content of the chick pineal gland
S.D. WAINWRIGHT and LILLIAN K. WAINWRIGHT 137

Wainwright, S.D.
Enzymes of guanine nucleotide metabolism and the diurnal cycle in cGMP content of the chick pineal gland
S.D. WAINWRIGHT and LILLIAN K. WAINWRIGHT 137

Walden, D.B.
Regulation of gene expression in corn (*Zea mays* L.) by heat shock. II. *In vitro* analysis of RNAs from heat-shocked seedlings
CHRIS L. BASZCZYNSKI, DAVID B. WALDEN, and BURR G. ATKINSON 395

Walker, D.
Insulin binding to differentiating muscle cells in culture
AMIRA KLIP, GRACE LI, and DENISE WALKER 644

Wang, J.H.
On the mechanism of interaction between calmodulin and calmodulin-dependent proteins
KUO CHIEH WANG, BULENT MUTUS, RAJENDRA K. SHARMA, HING-YAT PETER LAM, and JERRY H. WANG 911

Wang, K.C.
On the mechanism of interaction between calmodulin and calmodulin-dependent proteins
KUO CHIEH WANG, BULENT MUTUS, RAJENDRA K. SHARMA, HING-YAT PETER LAM, and JERRY H. WANG 911

Warner, A.H.
Distribution of elongation factor 2 between particulate and soluble fractions of the brine shrimp *Artemia* during early development
Z. YABLONKA-REUVENI, J.J. FONTAINE, and A.H. WARNER 833

Watanabe, M.
Purification and characterization of a membrane-associated testosterone-binding protein from *Pseudomonas testosteroni*
MIKE MCD. FRANCIS and MAMORU WATANABE 307

Waterman. M.R.
Regulation by ACTH of steroid hormone biosynthesis in the adrenal cortex
EVAN R. SIMPSON and MICHAEL R. WATERMAN 692

Waygood, E.B.
Determination of the levels of HPr and enzyme I of the phosphoenolpyruvate – sugar phosphotransferase system in *Escherichia coli* and *Salmonella typhimurium*
ROSHAN L. MATTOO and E. BRUCE WAYGOOD 29

A novel phosphoprotein dependent on the bacterial phosphoenolpyruvate – sugar phosphotransferase system
E. BRUCE WAYGOOD and ROSHAN L. MATTOO 150

Wei, J.-W.
Cations and calmodulin in normal and neoplastic cell growth regulation
ROBERT A. HICKIE, JIANN-W. WEI, LOIS M. BLYTH, DAVID Y.W. WONG, and DAVID J. KLAASSEN 934

Weigensberg, A.M.
Changes in Na^+-ATPase and Na,K-pump during maturation of sheep reticulocytes
RHODA BLOSTEIN, PIERRE DRAPEAU, STEPHEN BENDEROFF, and ANDREW M. WEIGENSBERG 23

Weiner, J.H.
Identification and physical characterization of a Col E1 hybrid plasmid containing a catalase gene of *Escherichia coli*
PETER C. LOEWEN, BARBARA L. TRIGGS, GLEN R. KLASSEN, and JOEL H. WEINER 1315

White, F.P.
Characterization of the synthesis and accumulation of a 71-kilodalton protein induced in rat tissues after hyperthermia
R. WILLIAM CURRIE and FREDRIC P. WHITE 438

Wieder, M.
Regulation of oxytocin receptor concentration in rat uterine explants by estrogen and progesterone
MELVYN S. SOLOFF, MATS AXEL FERNSTROM, SUMUDRA PERIYASAMY, SOLWEIG SOLOFF, SAM BALDWIN, and MICHAEL WIEDER 625

Wieder, M.H.
Oxytocin receptors in rat involuting mammary gland
MELVYN S. SOLOFF and MICHAEL H. WIEDER 631

Williams, D.
Mucin synthesis. III. UDP-GlcNAc:Galβ1-3(GlcNAcβ1-6)GalNAc-R (GlcNAc to Gal) β3-*N*-acetylglucosaminyltransferase, an enzyme in porcine gastric mucosa involved in the elongation of mucin-type oligosaccharides
INKA BROCKHAUSEN, DAVID WILLIAMS, KHUSHI L. MATTA, JEANNE ORR, and HARRY SCHACHTER 1322

Williams, R.E.
The circular dichroism of ovoverdin and other carotenoproteins from the lobster *Homarus americanus*
N. MARTIN YOUNG and ROSS E. WILLIAMS 1018

Williamson, D.G.
A highly sensitive method for identification of amino termini of proteins: application to multiple forms of poly(C)-avid ribonuclease and 17β-hydroxysteroid dehydrogenase
H. KAPLAN, G. ODA, G.R. ANTOUN, D.G. WILLIAMSON, B. TATTRIE, and E.Z. RABIN 323

Uptake of 17β-estradiol and its conjugates by isolated rabbit liver nuclei
J.H. TONG, E.I. SEPER, D.S. LAYNE, and D.G. WILLIAMSON 784

Wilson, A.C.
Effect of high fat and high sucrose feeding on lipogenesis by isolated rat intestinal cells
A.C. WILSON, R.C. GOLDSTEIN, A.R. CONN, and P.T. KUO 340

Wilson, E.J.
Effects of hormones on the maintenance and mitochondrial functions of rat hepatocytes cultured in serum-free medium
E. JANE WILSON and WILLIAM C. MCMURRAY 636

Wołoski, B.M.R.N.J.
Glycoprotein biosynthesis during the acute-phase response to inflammation
J.C. Jamieson, H.A. Kaplan, B.M.R.N.J. Wołoski, M. Hellman, and K. Ham **1041**

Wong, A.K.L.
In vitro binding of propranolol and progesterone to native and desialylated human orosomucoid
Allan K.L. Wong and J. Carleton Hsia **1114**

Wong, D.Y.W.
Cations and calmodulin in normal and neoplastic cell growth regulation
Robert A. Hickie, Jiann-W. Wei, Lois M. Blyth, David Y.W. Wong, and David J. Klaassen **934**

Wong, K.
The interactive effects of fluoride and *N*-formyl-L-methionyl-L-leucyl-L-phenylalanine on superoxide production and cAMP levels in human neutrophils
Kenneth Wong **569**

Wong, T.
Cellular distribution of enzymes involved in phosphatidylcholine synthesis in developing rat lung
Frank Chan, Paul G.R. Harding, Tanya Wong, G. Frazer Fellows, and Fred Possmayer **107**

Wong, T.
Evidence for the existence of a C_{25}-sesterterpene pathway of steroidogenesis not involving cholesterol as an obligatory intermediate
Bhagu R. Bhavnani and Tony Wong **714**

Wright, J.A.
A series of *N*-carbamoyloxyurea resistant cell lines with alterations in ribonucleotide reductase: lack of coordination in pyrimidine and purine reductase activity
Robert G. Hards and Jim A. Wright **120**

Yablonka-Reuveni, Z.
Distribution of elongation factor 2 between particulate and soluble fractions of the brine shrimp *Artemia* during early development
Z. Yablonka-Reuveni, J.J. Fontaine, and A.H. Warner **833**

Yamada, E.W.
Stripping of proteins from submitochondrial particles of rat skeletal muscle or bovine heart by chemical uncouplers
Esther W. Yamada and Norman J. Huzel **1006**

Young, N.M.
The circular dichroism of ovoverdin and other carotenoproteins from the lobster *Homarus americanus*
N. Martin Young and Ross E. Williams **1018**

Young, P.G.
The relationship of cardiolipin biosynthesis to mitochondrial protein synthesis in *Tetrahymena pyriformis*
Sean M. Hemmingsen, Laura Querengesser, and Paul G. Young **223**

Yousef, I.M.
Effect of Ca^{2+} ions on liver cell plasma membrane polypeptides
Ibrahim M. Yousef **293**

CANADIAN JOURNAL OF BIOCHEMISTRY AND CELL BIOLOGY/ REVUE CANADIENNE DE BIOCHIMIE ET BIOLOGIE CELLULAIRE

VOLUME 61 (1983)

SUBJECT INDEX/INDEX DES MATIERES

Acceptor peptide hormone review 670
Acetylated sialate hydrolysis feces enzyme 868
Acetylglucosaminyltransferase mucin stomach mucosa 1322
Acetylglucosaminyltransferase specificity oligosaccharide branching review 1049
Acetyltransferase serotonin pineal photoperiod 137
Achlya gene expression glutamine inhibition 262
Achlya heat shock protein formation 447
Achlya protein formation growth sporulation 1172
Acid phosphatase prostate androgen 744
Acrosin proacrosin conversion purifn 989
ACTH adenylate cyclase membrane 547
ACTH adrenal glomerulosa 538
ACTH mechanism review 692
Actin hydrophobic probe fluorescence 981
Actin inactivation liver cell membrane 85 93
Active site multifunctional enzyme liver 1166
Acute phase glycoprotein dolichol phosphate 1032
Acute phase glycoprotein inflammation review 1041
Acyltransferase lecithin cholesterol plasma 875
Adenylate cyclase membrane characterization 547
Adipose lipid synthesizing enzyme glucocorticoid 1245
Adipose phosphoenolpyruvate carboxykinase development 683
ADP actin inactivation membrane 93
Adrenal cholesterol metab stress 708
Adrenal glomerulosa ACTH 538
Alc dehydrogenase thermodn profile yeast 1201
Aldehyde dehydrogenas kinetics mechanism Beneckea 301
Aldosterone secretion ACTH 538
Alk phosphatase surfactant lung 231
Amino acid transport Ehrlich cell 165
Amino acid wheat germ system 1090
Amino terminus detn protein radioassay 323
Aminopeptidase brain synaptosome 1185
Amphibian protein formation heat shock 462
Anas corticosterone receptor salt gland duck 731
Androgen acid phosphatase prostate 744
Androgen estrogen peroxidase uterus 779
Androgen protein formation prostate 756
Androgen receptor fibroblast 770
Angiotensin receptor adrenal ACTH 538
Antigen conjugation site hapten melatonin 1096
Aorta elastin formation detn 1079
Apolipoprotein blood transfer lipoproteinlike emulsion 63
Arginase monomethylarginine hydrolysis kidney 850
Arsenite histone gene expression fly 414
Artemia elongation factor 2 embryo 833
Asparagine linked oligosaccharide conformation formation 1067
Asparagine oligosaccharide formation branching review 1049
ATP actin inactivation membrane 93
ATP fluoro interaction ATPase myosin NMR 115
ATP metab actin inactivation 85
ATPase calmodulin antagonist trifluoperazine 927
ATPase myosin interaction fluoro ATP NMR 115
ATPase ovary Rhodinius juvenile hormone 826
ATPase reticulocyte maturation 23
Azidobenzoylaminohexanoate succinimido 99
Bacteria phosphorprotein phosphoenolpyruvate sugar phosphotransferase 150
Bacteriochlorophyll energy transfer carotenoid 1117
Bacteroid membrane Rhizobium compn 1334
Basement lamina osteogenesis embryo review 967
Basement membrane development 949
Basement membrane integument morphol 957
Basement membrane macromol review 942
Beneckea aldehyde dehydrogenas kinetics mechanism 301
Benzamide azido carboxypentyl 99
Bioluminescence Beneckea aldehyde dehydrogenase mechanism 301
Bird acetylglucosaminyltransferase specificity review 1049
Blood apolipoprotein transfer lipoproteinlike emulsion 63
Blood platelet cAMP phosphodiesterase activation 1158
Bone formation embryo mesenchyme review 967
Brain beta galactosidase multiple form 313
Brain chondroitin sulfate proteoglycan embryo 1251
Brain nucleus glyceride formation 1265
Brain synaptosome aminopeptidase 1185
Butterfly heat shock protein formation 472
Cadmium parvalbumin ytterbium displacement NMR 860
Caenorhabditis heat shock protein mRNA 480
Calcineurin carboxyl methylation enzyme 921

Calcium apolipoprptein transfer blood 63
Calcium binding protein carboxyl methylation 921
Calcium extracellular mast cell activation 79
Calcium lipid membrane transition 346
Calcium neoplasm calmodulin review 934

Calcium phosphatidylglycerol thermotropic mesomorphism 882
Calcium platelet cAMP phosphodiesterase activation 1158
Calcium protein membrane liver 293
Calcium uptake mast cell 72
Calmodulin antagonist trifluoperazine ATPase 927
Calmodulin carboxyl methylation enzyme 921
Calmodulin cyclic nucleotide phosphodiesterase interaction 911
Calmodulin inhibitor neoplasm review 934
Calmodulin review 906
Calpodes heat shock protein formation 472
Calvaria collagen heterogeneity embryo 1012
cAMP formation neutrophil formylmethionyleucylphenylalanine fluoride 569
cAMP intermediate pituitary review 516
cAMP lipogenesis liver 207
cAMP phosphodiesterase activation blood platelet 1158
cAMP plasminogen activator formation testis 553
Candida desaturase oleoyl stearoyl CoA 171
Candida oleoyl desatn phospholipid 1191
Capsule polysaccharide structure Streptococcus 1102
Capsule polysaccharide structure Streptococcus correction 1341
Capsule Streptococcus polysaccharide structure 178
Carbamoyloxyurea resistant cell ribonucleotide reductase 120
Carboxykinase phosphoenolpyruvate organ development 683
Carboxyl methylation calcium binding protein 921
Carcinoma liver fetoprotein guinea pig 1133
Cardiolipin Tetrahymena mitochondria protein formation 223
Carnitine liver plasma monkey 328
Carotenoid energy transfer bacteriochlorophyll 1117
Carotenoid triterpenoid Staphylococcus squalene xanthophyll 892
Carotenoprotein Homarus CD 1018
Cartilage chondroitin sulfate proteoglycan embryo 1251
Casein mRNA polyadenylate 353
Catalase gene Escherichia plasmid pLC3619 1315
Catalase Proteus mirabilis purifn 8
Catalase Proteus mutant 1219
Catecholamine intermediate pituitary review 516
Cation apolipoprotrein transfer blood 63
CD carotenoprotein Homarus 1018
Cell carbamoyloxyurea resistant ribonucleotide reductase 120
Cell killing hyperthermia protein lipid 421
Cell membrane liver actin inactivation 85 93
Cell membrane protein calcium liver 293
Cell thermotolerance heat shock protein 428
cGMP lipogenesis liver 207
cGMP phosphodiesterase pineal photoperiod 137
Cholesterol intestine diet fat sucrose 340
Cholesterol lipid membrane transition 346
Cholesterol metab adrenal stress 708
Cholesterol metab liver muscular dystrophy 378
Chondroitin sulfate proteoglycan organ embryo 1251
Chromatin Achlya heat shock 447
Chromatog triglyceride detn biol 840
Cockroach juvenile hormone esterase 811
Cold shock protein formation Rana 462
Collagen basement membrane review 942
Collagen heterogeneity calvaria embryo 1012
Conformation asparagine linked oligosaccharide formation 1067
Conjugation hormone tremerogen Tremella 796
Corn gene heat shock protein 395
Correction guinea pig fetoprotein 1341
Correction phospholipid intestine diet fat 229
Correction Streptococcus capsule polysaccharide structure 1341
Corticosteroid formation ACTH review 692
Corticosteroid formation dinorcholenediol 714
Corticosterone receptor salt gland duck 731
Corticosterone secretion ACTH 538
Cortisol formation dinorcholenediol 714
CRF intermediate pituitary review 516
Crithidia rRNA sequence 38
Crustacean ovoverdin CD 1018
Crustacean protein elongation factor embryo 833
Crustacyanin Homarus CD 1018
Cryoprotectant polyol Eurosta NMR 1260
Cyclase adenylate membrane characterization 547
Cyclase guanylate pineal photoperiod 137
Cyclic nucleotide lipogenesis liver 207
Cyclic nucleotide phosphodiesterase calmodulin interaction 911
Cyclohydrolase methenyltetrahydrofolate active site liver 1166
Cytochrome Rhizobium bacteroid membrane 1334
Cytosol liver estradiol sulfotransferase 15
Decarboxylase DOPA Drosophila ecdysterone 818
Dehydrogenas aldehyde kinetics mechanism Beneckea 301
Dehydrogenase alc thermodn profile yeast 1201
Dehydrogenase hydroxy steroid amino terminus 323
Dehydrogenase methylenetetrahydrofolate active site liver 1166
Deoxypolypyrimidine DNA complementarity mRNA fibroblast 1123
